## 2. Verbal

- System personnel are not to discuss specific patients in public areas. Loose or "elevator talk" regarding specific patient problems and/or care is inappropriate.
- Do not repeat to your friends and relatives, or the friends and relatives of patients, any information learned through the course of carrying out your duties. If you learn of the hospitalization of a friend or relative, you may not act on that information or pass it on unless it came from an outside source or the patient himself. If you happen upon information (or the chart) of a friend or relative in the course of performing your job, you are responsible for keeping that information confidential.

## 3. Radio

- Generally, no patient name will be mentioned in the process of pre-hospital radio transmissions utilizing MERCI regarding non-direct admit patients.
- Customary "Direct Admits" may need to have the initials of patient's names included in the radio transmissions. This is necessary for identification and is acceptable to transmit.
- Sensitive patient information regarding diagnosis or prognosis should not be discussed during radio transmissions.

## D. Scene

- Every effort should be made to maintain the patient's auditory and visual privacy during treatment at the scene and en route.
- EMS personnel should limit bystanders at the scene of an emergency. Law enforcement may be called upon to assist in maintaining bystanders at a reasonable distance.
- EMS providers whom encounter an individual filming a scene, should not directly confront the individual. Rather create a barrier around the patient using providers, vehicles, or blankets. The patient should be moved as quickly as what is safe to the waiting ambulance.
