Subject: Items related to the new electronic documentation program
Importance: High

Sue: please forward this information to the members of the MCAEMS System. Thank you, Greg

I wanted to share information related to the new Code Red documentation program. I have attached the hardware requirements for the field unit as well as the administrator computers. If any EMS agencies desire or need to update their laptops, Dan Duncan from Lexington Ambulance has offered to serve as the point of contact working toward a possible group purchase discount of GETAC ruggedized laptops. Dan may be contacted at 309-531-4894 or danielduncan0619@aol.com

Also, Code Red spoke of Mediclaims, Inc. during their demonstration to the EMS System members related to EMS billing services. If any agencies are interested in obtaining further information in this service, please contact Tammy Campbell 800-538-8278 ext. 202 or tcampbell@mediclaims.com

Please do not hesitate to contact the EMS office if you have questions related to this matter. Sincerely, Greg
